Clocks, Stopwatches and Timers

From big outdoor clocks to table top clocks, cheap and cheerful stopwatches to the classic mechanical model. See the leaflet, or colour pdf online

OFFER

Precision Ultrasonic Cleaning
the **Ultrawave** Way

The item to be cleaned is simply immersed in a suitable fluid in the bath and the powerful yet gentle electronic waves of ultrasound within the fluid remove soils from even the most inaccessible crevices. Cleaning, that by hand systems used to take possibly hours, can now be completed to the highest degree in minutes. Many components need not even be stripped down.

Ultrawave Cleaners are quiet in operation, all fitted with 15 minute timers and conforming indicators.

Special Discounted Price during April only – don't miss it!!
